## MEDICAL TOURISM

While still evolving today, people have been traveling for healthcare since the Greeks and Romans. As innovation and quality outcomes in other countries continue to increase, international patients are quickly looking for better solutions.

## WHY INTERNATIONAL PATIENTS ARE CHOOSING HEALTHCARE OVERSEAS

Cost savings, high quality care, and the desire for a holistic approach to their care are all reasons international patients give for seeking healthcare outside of their home countries.

## HEALTH CITY CAYMAN ISLANDS: AN EASY CHOICE

Health City Cayman Islands was founded by Mother Teresa's personal physician, renowned cardiac surgeon and award-winning medical pioneer, Dr. Devi Shetty, Chairman of Narayana Health. As one of the world's largest healthcare service providers, Narayana Health operates 49 facilities in India, celebrates some of the best surgical outcomes in the world, and provides these services at costs unheard of in other countries. Dr. Shetty built the hospital for patient care using a unique and innovative business plan focusing on high quality healthcare at an affordable price. Costs are kept low by implementing cost efficient processes, sustainable buildings, and a bundled pricing model that provides patients with an upfront, flat rate fee for every procedure and associated service. The physicians and surgeons on staff are highly skilled with several years of specialized medical experience, practicing in our JCI accredited hospital.

## WHY GRAND CAYMAN?

Grand Cayman offers a first world infrastructure in a safe, family friendly environment. Known as the culinary capital of the Caribbean, Grand Cayman is an English speaking destination, accepts the US dollar, and is a tropical paradise just an hour from Miami, as well as daily non-stops from multiple destinations.

## CONCIERGE SERVICE

Health City Cayman Islands prides itself on offering a seamless, end-to-end service for its international patients. Patients receive exceptional service and care every step of the way. Each international patient is assigned a Patient Care Representative, who serves as a personal point of contact throughout the process.
